## **MESSAGE**

To my dear Jagnaanons,

Running a local government unit is not an easy task especially with the varied concerns, issues and needs that need to be addressed and the limited resources. With my zeal to serve and being given the mandate in the last political exercise, I am optimistic that we can continue what has been started and deliver the services and programs being mandated for the betterment of the general populace, notwithstanding my novelty in the local governance arena. But of course, I am certain that everything is possible with everyone's support.

In my first year within my first term as your Local Chief Executive, I find the Executive-Legislative Agenda (ELA), a good development tool in local governance since it leads the executive and legislative branches towards a unified direction through programs, projects and activities anchored on prioritized needs and issues. Thus, may this document, the ELA which is a product of the toil of the municipal officials, functionaries and other stakeholders, be our guide as we traverse the three-year journey for good local governance.

Let us all join hands, support the ELA and work for the sustainable development of our beloved town of Jagna. Mabuhay!

## **VISION**

Jagna is the leading center of trade, sustainable agro-processing and eco-tourism in southeastern Bohol, with self-reliant men and women living a better quality of life, preserving their cultural heritage and efficiently managing natural resources through good governance.

## **MISSION**

In order to realize our vision and fulfill our aspirations, we therefore commit ourselves:

- to the institutionalization of good governance by transforming the local government unit into one that is committed to uphold, promote, and protect, the interest, rights, and welfare of its people;
- to the preservation of our rich cultural heritage and foundational values by embodying, respecting, and espousing the traditions, practices, and beliefs that characterized Jagna's history, and built its present;
- to the promotion of Jagna as a municipality conducive to initiatives for economic development, tourism promotion and environmental protection.

## **LGU PROFILE**

### *Brief History*

Jagna appears in historical documents as early as March 15, 1565 when Miguel Lopez de Legaspi was driven by unfavorable winds towards Jagna Bay after his expedition left Camiguin and headed for Butuan. Three days later, the first mass in Bohol was celebrated in the shores of Jagna by Fr. Andres Urdaneta and other friars aboard the flagship “San Pedro” as it underwent repair prior to the invasion of Cebu.

In the Libro de Cosas Notables de Jagna (the first written history of Jagna) authored by Fr. Ambrosio Iturriaga, an Augustinian Recollect priest, it was in 1631 when the Missionaries of the Society of Jesus erected the “mission of Jagna”. In particular, it was Fr. Jose Sanchez who came to Jagna and established the Parish of San Miguel de Jagna with Saint Michael the Archangel as the patron saint (under the Jesuits, the parish was established simultaneously with that of the town as in the case of Jagna).

Three etymologies have been offered by various authors for a typonymic study of Jagna. In the Vocabulario de lengua bisaya (Vocabulary of the Visayan language) by Fr. Matheo Sanchez, S.J. and published in Manila in 1711, the Visayan term hagna is the equivalent of the Spanish cienaga which is swamp or marshy moor. In addition, Hagna refers to a pueblo in Bohol known by another name San Miguel (St. Michael).

On the otherhand, the Augustinian Recollect, Fr. Juan Felix de la Encarnacion, author of the Diccionario Bisaya-Espanol, first published in 1852, has two Spanish meanings for the Visayan word hagna and these are **basac** (field planted with rice) and **cienaga** (swamp, marshy moor).

While, according to oral tradition, the name of Jagna was derived from the legendary vernacular exclamation “ni hagna na”. Local folklore relates that the now dried-up Boho River beside the present day municipal building used to teem with fish called “tigue”. When this fish played near the water surface, it is said that the water sizzled like boiling coconut oil. Upon seeing this, the people would exclaim **ni hagna na** literally meaning that cooking was almost done.

### *Municipal Brief*

Jagna is a third class municipality in southeastern Bohol. It is the only coastal town in the area with a commercial port facility. This makes Jagna not only a strategic point for sea transport as it straddles a major Visayas-Mindanao sea lane, but also an important trading and commercial facility.

Only 63 kilometers away from Tagbilaran City, Jagna can be reached by land from the capital city in approximately an hour's travel time. The municipality has been identified as part of the nautical tourism highway and an important gateway in the south to and from Mindanao.

Jagna has a total population of 32,034 based on the 2007 NSO survey and households numbering 6,500. It consists of 33 barangays with a total land area of 12,063 hectares. Jagna is subdivided into three major categories, the urban area appropriately called the Metro Jagna cluster is composed of the barangays of Bunga Mar, Can-upao, Looc, Pagina, Canjulao, Poblacion, Tejero and Pangdan covering a total land area of 316.05 hectares or 2.62% of the total area of the municipality. The Coastal Jagna cluster covers a total land area of 747.04 hectares or 6.19% and includes Alejawan, Cantagay, Can-uba, Ipil, Larapan, Naatang, Nausok and Tubod Mar. Ninety one percent (91%) of the total land area of Jagna is considered to comprise the Upland Jagna cluster having a total land area of 10, 999.91 hectares. It covers the barangays of Balili, Boctol, Bunga Ilaya, Buyog, Cabungaan, Calabacita, Cambugason, Can-ipol, Cantuyoc, Faraon, Kinagbaan, Laca, Lonoy, Malbog, Mayana, Odiong and Tubod Monte.

### *Economic Profile*

Predominantly, an agricultural town, farming is the main occupation of the 17 upland barangays with coconut, vegetables, spices, rice, corn, rootcrops and bananas as the main products. PDMS survey in 2009 showed that 2,835 households or 45.02 % of the total number of households of Jagna are basically engaged in farming. However, it's not only the seventeen (17) upland barangays are into farming but also the four (4) other coastal and one (1) urbanizing barangay. However, farming activities in the upland barangays are more intensive compared to that in the coastal and urbanizing barangays where farming is not the only source of livelihood but is resorted to when fishing and paid labor are scarce.

While Jagna is considered a coastal town, there are only few small-scale commercial fishing in the area and the rest are mostly subsistence fishing. Presently, there are three (3) barangays – two (2) under the coastal cluster and one (1) under Metro Jagna which depend upon fishing as the main source of livelihood. The other coastal communities are primarily farming communities with fishing as their secondary source of income.

Even if agriculture is the primary economic activity of the municipality, the main driver of the economy is trading and other services. There are only few medium, several small and a great number of micro-enterprises, majority of which are into trading particularly retail of various types and services. Only a few are into manufacturing and agri-business. These establishments generated income and employment and facilitated the influx and availability of goods and services in the locality. The marketplace is the center of trading and commercial transactions in the municipality.

While, calamay-making and body-building (jeepney and tricycles) are considered major cottage industries in Jagna. The calamay, the locality's century-old delicacy has about 70 producers from Can-upao, Looc, Pagina, Bunga Ilaya and Canjulao. Other minor cottage industries operating in the municipality are food-related ventures such as tableya making in barangay Canjulao, cookies in Pangdan, salabat production in Laca, ubi powder of the Local DA, suman and dinomogan in Tubod Monte and peanut butter in Tubod Mar.

While, tourism in Jagna has always remained a minor driver of economic activity. Nevertheless, the LGU had already identified more than a dozen tourist spots and attractions which include resorts, caves, waterfalls, landscapes, historical landmarks and even religious or pilgrim sites.

### *Social Services Profile*

#### **Healthcare**

There are four (4) major health institutions in Jagna, the Teodoro B. Galagar District Hospital, the Lim Community Hospital and the Rural Health Units 1 & 2. The Teodoro B. Galagar District Hospital (TBGDH), a tertiary hospital serves as the flagship hospital of the 3<sup>rd</sup> district of Bohol particularly the neighboring towns of Jagna. While, the Lim Hospital is a secondary hospital equipped with modern facilities comparable to those in the capital city. The Rural Health Unit (RHU) 1 caters to 22 barangays while the Rural Health Unit (RHU 2) based in Barangay Mayana, covers 11 barangays with 12,842 people or 40% of total population.

Aside from the said institutions, there are also five private clinics operating in the municipality which are medical, obstetrical, pediatric dental and eye clinics. Augmenting the said institutions and healthcare providers are the Barangay Health Centers in all the thirty-three barangays manned by the 207 Barangay Health Workers (BHWs), and 13 midwives.

The six - year partnership with Philos Health, a US - based health NGO has significantly contributed to the improvement of the delivery of health services. There is the sustained provision of medicines especially for diabetes and hypertension and a Philos-paid nurse monitors related cases in the barangays. Equipments, supplies and materials had also been given to the LGU/RHUs and the district hospital. There were also special health projects like providing prosthetics to persons with physical disabilities and medication of patients with grave health conditions. The RHU 2 building construction was made possible through its financial counterpart and donations of equipments. A donated vehicle from Philos Health has facilitated the mobility of the RHU 2 health providers.

#### **Education**

The Municipality of Jagna has a total of 33 learning institutions, both public and private. Basic education is being provided by 3 primary schools, 21 elementary schools and 7 high schools strategically located in the municipality. Tertiary education is offered by 1 college

(Bohol Institute of Technology-International College) and 1 technical/vocational school managed by the Technical Education and Skills Development Authority (TESDA). Public schools provide majority of the basic education services in the municipality while private schools served mostly Jagna's secondary and tertiary education levels.

There are also 34 Day Care Centers in the thirty-three (33) barangays aside from five (5) privately owned and managed pre-school centers in the municipality.

### **Social Welfare**

Social welfare programs are categorized as social security, personal social services and public assistance. These are extended to the community most particularly to children, out-of school youth, women, family, elderly, persons with disabilities, and the disadvantages sectors. These are the focus of social welfare services through different programs and projects. Most of these sectors are organized and are engaged in several activities in the communities.

### **Gender and Development**

In the 2009 PDMS survey, the women sector comprises 48.86% of the municipality's total population. Though, women still continue to dominate the reproductive sphere in the gender roles, there is a growing number of those who are balancing this with their productive, community management and constituency-based politics roles as well.

While most of the women in the upland barangay are doing housekeeping work, many of them assist in the farms. While those who are in the labor force, are into the service and trading sectors. There are also a significant number of women who are practicing their professions in the health and education sectors as well as those in business and in administrative and managerial positions in both in private and government institutions. While in terms of governance, data reveals that elective positions in the municipal and barangay government units are still male-dominated.

While women have become part of the labor force and have not limited themselves to voluntary care work, gender bias is still prevalent not only in the homes but in the thinking of the community and the workplace. Although Information, Education Communication (IEC) campaign, have also been conducted by different women's group and the Municipal Technical Working Group on Gender and there has been an improvement, still there is a manifestation of gender bias prevailing as shown in the daily interaction with the sexes. Thus, the need to intensify and continue the dissemination of Gender and Development (GAD), women's economic empowerment and other related concerns.

### *Environmental Profile*

Sixty four percent of Jagna's land area is karst formation of the Sierra Bullones limestone. This is classified as delicate since all types of pollutants and contaminants may find their way into the water source. Its soil composition is predominantly clay and almost 58% of its land is highly susceptible to soil erosion due to the sloping and steep terrain.

The protected areas in Jagna include six upland barangays, four of which are declared as watershed areas belonging to the Alejawan-Cansuhay-Anibongan Watershed Forest Reserve (ACARWFR). These areas are situated in barangay Odiong, as National Park; Boctol, as Natural Monument; Mayana, as Wildlife Sanctuary; and Lonoy, as Strict Nature Reserve which comprises a total area of 1,863 hectares.

The coastline of the municipality stretches up to 14 kilometers, passing 14 barangays (8 from the coastal cluster and 6 from Metro Jagna). It is endowed with rich coastal resources consisting of 146 fish species belonging to 27 families, 6 species of seagrass and excellent coral reef in ten (10) out of the fourteen (14) coastal barangays.

A concrete manifestation of the municipality's effort in properly managing waste is the Ten-year Solid Waste Management Plan being implemented in the seven (7) metro Jagna barangays.

### *Physical and Infrastructure Profile*

Jagna has an adequately developed physical infrastructure facilities such as road network, transport, port and communication facilities and other physical infrastructure.

The municipality has 20 waterworks system serving safe and potable drinking water to 23 out of the 33 barangays. This includes the fourteen (14) Level II water systems and the existing municipal waterworks system.

While all the barangays in Jagna are energized by Bohol Electric Company (BOHECO) II but there remains a 5% households unconnected with electricity.

Communication facilities presently serving the municipality are the Philippine Postal Corporation for postal services; the Islacom owned by GLOBE Telecommunications Incorporated and Cruztelco for telephone services; the Smart, Sun and Globe Communications Incorporated for cellular/mobile phone services; the Radyo Natin FM Station and Jagna Community Radio (DYJP) for broadcast/radio; the San Miguel Cable TV, for television; the LBC and DHL for courier services, the Internet Cafés and the Bohol Local Enforcement Communication System (BLECS).
